HOW MANY FORECASTS WILL I RECEIVE PER MONTH??

You will receive an average of 27 forecasts each month. And the primary difference between each forecast is the time horizon for which they are intended to be used.

Here is a full description of each forecast and the appropriate time frame:

1) You will receive 5 daily forecasts per week (Monday through Friday).
This is a total of 22 daily forecasts per month (average of 22 trading days).
And these forecasts are intended to be used on a day-to-day basis.

Therefore, the daily forecast that you receive tonight, is intended to forecast the potential market direction for the upcoming trading day.

2) You will receive 4 weekly forecasts per month. And these forecasts are intended to be used on a week-to-week basis.

Therefore, the weekly forecast that you receive this weekend, is intended to forecast the potential market direction for the upcoming trading week.

3) You will receive 1 monthly forecast each month. And these forecasts are intended to be used on a month-to-month basis.

Therefore, the monthly forecast that you receive this month, is intended to forecast the potential market direction for the upcoming month (next 30 days).

HOW DO I RECEIVE MY FORECASTS??

You will receive your forecasts directly through email.
And we can send your forecasts to any email address that you provide.

WHEN DO I RECEIVE MY FORECASTS??

After signing up for our service, your account will immediately be activated in our subscriber database.
And you will immediately begin to start receiving your forecasts, according to the schedule below:

DAILY FORECAST SCHEDULE:

You will receive your daily forecasts every weekday (Monday through Friday) between 3:00 AM and 6:00 AM GMT. Allowing you a MINIMUM of two hours to prepare for the high-liquidity trading sessions ahead (London and New York).

PLEASE NOTE: FOR OUR CLIENTS IN ASIA

The hours between 3:00 AM and 6:00 AM GMT are the equivalent of the hours between 12:00 PM and 3:00 PM JST (Tokyo time).

PLEASE NOTE: FOR OUR CLIENTS IN THE AMERICAS

The hours between 3:00 AM and 6:00 AM GMT are the equivalent of the hours between 10:00 PM and 1:00 AM EST (New York time).

WEEKLY FORECAST SCHEDULE:

- You will receive your **weekly** forecasts every Sunday morning PRIOR to the upcoming week.
And they will arrive at the same time as your daily forecasts (between 3 AM and 6 AM GMT).

MONTHLY FORECAST SCHEDULE:

- You will receive your monthly forecasts on the day (or weekend) PRIOR to the upcoming month.
And they will arrive at the same time as your daily forecasts (between 3AM and 6AM GMT).

For Example:

If the first day of the new month starts on a Wednesday (as an example), you will receive that monthly forecast on Wednesday morning. Several hours before the opening of the market.

And if the first day of the new month starts on a Monday (as an example), you will receive that monthly forecast on Sunday morning, PRIOR to the start of the new month.

WHAT IS THE NEXT STEP??](#)

WHAT IS THE MONTHLY PRICE OF THE SUBSCRIPTION?? AND WHAT IS THE "CLIENT REWARDS PROGRAM"??

The monthly subscription for our Premium Forecasting Service costs \$99 per month. But our most loyal clients receive an additional 50% discount and pay only \$49 per month.

WHY DO WE OFFER CERTAIN CLIENTS A 50% DISCOUNT??

We feel that we have the most loyal clients in the retail forex industry. And this is confirmed by the fact that less than 4% of our clients ever unsubscribe from our service on any given year.

Giving us (by far) the highest renewal rate of any service of this kind.

Therefore, we think it is appropriate that we reward our clients with an ongoing discount on their monthly subscription. And below you will find a full description of how it works:

HOW TO QUALIFY FOR OUR 50% DISCOUNT:

- 1) For your first month of service, your subscription will be only \$99. And this will qualify you to receive our full collection of indicators, absolutely free.
- 2) For your second month of service, you will **receive a \$25 discount** and would pay only \$74.
- 3) And for your third month of service, you will **receive an additional \$25 discount** and would pay only \$49.

After only your third month of service, you will achieve the maximum discount possible. And your monthly subscription will remain at only \$49 indefinitely. This is a full 50% discount from our regular subscription price of \$99. And best of all, this entire process is taken care of automatically. With no need for you to fill out any forms, no need to provide any discount codes and no need to make any requests of any kind.

WHAT PAYMENT METHODS ARE ACCEPTED??

We accept all major credit cards and all payments are processed directly through Paypal.
And you do NOT need a Paypal account to subscribe.

IS MY PAYMENT SECURE AND IS MY DATA PROTECTED??

For your safety and security, all payments are processed directly through Paypal.
And you do NOT need a Paypal account to subscribe.

ABOUT PAYPAL:

Paypal is one of the largest, most trusted payment processors in the entire world.
They have over **250 million active users** and they operate in over **200 countries**.
And they process over **7 billion payment transactions** every year.

In fact, if Paypal was a bank, they would be the 21st largest bank in America.
Right behind Capital One and TD Bank.

Most importantly, Paypal employs the most advanced end-to-end encryption and
anti-fraud technology available anywhere. And all this is done to ensure that both
your data and your payment are as secure as possible.

I'M READY TO GET STARTED. WHAT IS THE NEXT STEP??

Simply click on the 'Subscribe' button at the bottom of our [forecast page](#) to get started.

WHAT SHOULD I EXPECT AFTER I SUBSCRIBE??

After subscribing, you will be directed to our private download page. And from there you will be able to immediately download your new collection of indicators. As well as lots of great information for using your new files.

This includes all the details regarding the best settings, best time frames, best pairs to monitor etc. As well as some very important recommendations, for achieving the best possible results going forward.

After downloading your new indicators (and reviewing the additional trading information), there is nothing else you need to do. And you will begin receiving your new forecasts on the very same day.

PLEASE NOTE:

If you have any questions please do not hesitate to send us an email at Support@ScorpionFX.com. And one of our dedicated account managers will be sure to contact you as soon as possible.

CAN I CANCEL MY SERVICE IF NECESSARY??

Yes, of course. You are free to cancel your service at any time.

A very, very small percentage of our clients ever cancel their service within the first year (less than 4%). As our research (and our liquidity levels) gives them an enormous advantage against the rest of the retail world. But we also understand that circumstances can sometimes change. And if you ever need to cancel your service, we will be here to assist you.

IF I DECIDE TO CANCEL MY SERVICE, DO I STILL KEEP ALL THE INDICATORS??

Yes, absolutely. Our entire collection of indicators (worth over \$1,200) is yours to keep forever.

We have invested many years of institutional experience into creating these indicators. And we are proud to say that our indicators are currently being used by well over *fifty-thousand (50,000)* retail-traders around the world. So we are highly-confident that they will assist you in finding numerous trading-opportunities going forward.

WHAT IS THE NEXT STEP??](#)

IF I DECIDE TO CANCEL MY SERVICE, DO I RECEIVE A REFUND??

Unfortunately we cannot offer any refunds on our service. And if you choose to cancel your subscription, we cannot refund any portion of the remaining month.

AND HERE IS A DETAILED EXPLANATION WHY:

Unfortunately, there are lots of people trading forex who are simply looking to get rich quick. These traders usually have a 'gambler' mentality. Or they have highly unrealistic expectations about trading. As they really think that they are going to find the 'Holy Grail'. Or they expect to find some 'magic' trading system that will make them rich in a few months.

These clients go around buying all kinds of indicators and subscribing to all kinds of services. And if they don't get 100% winning trades (or double their account in 30 days), then they will make ridiculous complaints or try to demand a refund. Even if the product or service is highly profitable. And even if their losses are caused by their own reckless trading.

Not only would this be unfair to us (as a company) but it would also be unfair to our over 1,400 loyal clients from all around the world who pay for their service every month. And our policy (no refunds under any circumstances) is the only way we can protect ourselves against these kinds of unrealistic clients.

We hope you understand our position on this matter and please do not hesitate to let us know if you have any questions regarding this issue. As we are always here to help.

[I'M READY TO GET STARTED.
WHAT IS THE NEXT STEP??](#)

OUR EXPERIENCE AND OUR TRADING PERFORMANCE:

Unlike 99.9% of the forex vendors online, we actually trade for a living.

We are REAL TRADERS, who trade REAL MONEY every week. And we have been managing client funds (profitably) since 2006. During which time we have out-performed every major asset-class, including equities, commodities, bonds and the Credit Suisse Hedge Fund index.

In addition to managing client funds, we also currently own a **Guinness World Record** for the most consecutive winning trades in a row. With **1,426 consecutive winning trades**. *(Please see the video on our site)*

And we recommend that you take a look at the myfxbook.com page below. Where you will see how one of our clients was able to make **737 consecutive winning trades in 2018**, using one of our proprietary strategies. And we later turned this strategy into an EA for this client.

<https://www.myfxbook.com/members/jaringfx/scorpionfx/2547870>

AND THERE IS MUCH, MUCH MORE PERFORMANCE DATA AVAILABLE FOR YOU TO ANALYZE:

For further details, we strongly recommend that you take a look at our 3 short videos (on our site) and take a look at our performance page. As this will give you an excellent perspective on our performance and approach to the market.

As you will see, since 2016 we have posted over 2,000 trades on our website. And these trades have all been posted publicly (and free of charge), for the benefit of our clients.

These trades have encompassed the full spectrum of trading styles. From longer term trading, based on global macro fundamentals, to short term (intraday) trading using real-time interpretation of inter-market analysis and economic news events.

In 2017 alone, these trades resulted in **over 10,000 pips** of profit for our clients. And overall, these trades have generated **over 50,000 pips** since 2016.

Best of all, these trades all include full, detailed trade summaries that provide a wealth of institutional insight. And give you a thorough, in-depth perspective of our overall approach to the market.

VERY IMPORTANT, PLEASE NOTE:

These trades described above (and the pips earned) are part of a free, complimentary service that we have been offering our visitors since 2016. But these trades are different (and separate) from the trades provided in our Premium Forecasts.

The free trades (described above) generated over 50,000 pips over a five year span (2016 through 2020). While the trades provided in our Premium Forecasts generated over 75,000 pips in one year alone (August of 2019 to August of 2020). With our top clients generating an **AVERAGE of 7,000 to 10,000 pips per month**.

For full and comprehensive details regarding all of this (and access to all the data), please follow the link below:

THE BEST PAIRS AND THE BEST TIME FRAMES
TO TRADE WITH THESE FORECASTS??](#)

[FULL SUMMARY OF
MEMBERSHIP BENEFITS:](#)

[I'M READY TO GET STARTED.
WHAT IS THE NEXT STEP??](#)

FULL SUMMARY OF MEMBERSHIP BENEFITS:

- 1) When you sign up, you will start receiving your forecasts the very same day. And going forward, you will receive all of our daily, weekly and monthly forecasts, directly in your inbox.

This is a total of over 25 forecasts every single month. Providing you with the statistical edge you need to enter the market with confidence. And helping you grow your account, using a proven and reliable institutional approach.

- 2) When you sign up, you will also receive our full collection of top-rated indicators, **absolutely free**. These indicators are currently being used by well over **50,000 traders** all around the world. And these indicators have received **hundreds of 5-star reviews** in the last few years alone.

Best of all, these indicators are the perfect complement for our forecasting service. As our indicators have been designed to simultaneously monitor the ENTIRE MARKET (all pairs and all time frames), all from one chart.

This ability to easily monitor the entire market, will provide you with a big advantage over the vast majority of traders. As this will save you an enormous amount of time and effort when looking for your trading opportunities. And will give you the freedom and flexibility to focus on other aspects of your trading.

This indicator package is currently selling for over **\$1,200**. And your new indicators will be available for **immediate download**.

Visit our [indicator page](#) to learn more about our indicator package.

- 3) When you sign up, you will also be assigned a dedicated account manager.

Your account manager will be personally contacting you (through email) and will be sending you everything you need to start using your new forecasts, as soon as possible. And your account manager will also be there to assist you with anything you may need going forward.

[LEARN ABOUT
OUR EXPERIENCE AND OUR
TRADING PERFORMANCE:](#)

[I'M READY TO GET STARTED.
WHAT IS THE NEXT STEP??](#)

WHAT ARE THE BEST STRATEGIES, THE BEST PAIRS AND BEST TIME FRAMES TO TRADE WITH THESE FORECASTS??

This is a very important question and you will find a full and detailed reply below.

We will tell you about the various ways that our clients are using our forecasts. And we will also tell you about the most profitable (and one of the most popular) strategies that is used in the institutional world.

But it is very, very important for you to read the remainder of this section in its entirety. Because regardless of whether or not you sign up for our service, it is critical (for your long term trading success) that you keep this information in mind going forward. As this information applies to several aspects of your future trading.

THE FIRST FACTOR TO KEEP IN MIND:

EVERY TRADER IS DIFFERENT. THEREFORE, IN ORDER TO ACHIEVE THE BEST LONG-TERM RESULTS, YOUR STRATEGY MUST BE ALIGNED WITH YOUR OWN PERSONALITY AND TRADING PREFERENCES.

We have discovered over the years, after working with literally THOUSANDS of traders (both institutional and retail), that traders will always achieve the best long-term results, when they are able to develop and implement their own trading plans. As opposed to having to follow someone else's rules or guidelines.

To give you an example, we've worked with institutional guys who are highly successful trading the slow moving Asian session. And other guys who are highly successful during (and especially after) news events. While others focus on momentum or breakouts. And yet others who specialize in (and have great success) trading reversals.

These are all vastly different strategies and they can all be highly profitable. Yet different people are better suited (psychologically) for each one. Therefore, your very first step should be to figure out the general guidelines that best fit your personality and your trading preferences.

Here are just a few basic questions to ask yourself. And remember that there are no right or wrong answers here. The goal is simply to determine which type of trading approach best fits your personality and your preferences:

- Do you prefer to trade the faster moving, more volatile pairs??
Or do you prefer to trade the slower moving, less volatile pairs??
- Do you prefer to trade intraday on the 1-Minute or 5-Minute charts??
Or do you prefer the 4-Hour or Daily charts??
- Do you prefer to trade more often?? Or less often??
In other words, do you want to enter two trades per week??
Or do you want to enter two trades per hour??
- Do you prefer to trade during the quiet (less turbulent), Asian market hours??
Or do you prefer to trade the high liquidity overlap between London and New York??
- Do you prefer to trade a few pairs at a time??
Or do you prefer to trade large baskets??

These are just a few of the questions that every trader should answer, before they decide on a strategy that they wish to pursue. Because if someone else's strategy doesn't fit with your personality, then you will eventually start to second-guess and slowly begin to change the rules and the parameters.

Or you might just abandon the strategy completely. Especially after a series of consecutive losing trades.

***EVEN THE MOST PROFITABLE INSTITUTIONAL STRATEGIES
MIGHT NOT BE THE BEST STRATEGY FOR YOU (PERSONALLY):***

After being involved in this industry for over 25 years, we know that the best long term odds of success comes from trading lower volatility instruments, with a ranging strategy, over the longer time horizons. Such as trading the AUDCAD or the EURGBP with trades that last anywhere from a few weeks, to several years.

This strategy provides an excellent risk to reward ratio, along with lower levels of overall volatility. And since market fundamentals take weeks, months and even years to play themselves out, this type of strategy also allows the longer term fundamentals to come into alignment for each trade.

As you could imagine, this is a very popular strategy for many of the world's largest and most profitable institutions. In fact, this is the same type of approach that is highly emphasized by giant institutions such as BlackRock and Vanguard. With over **\$12+ trillion** worth of combined assets under management, these two institutions are (by far) the largest asset managers in the entire world. And they focus heavily on low volatility, highly range-bound instruments. Such as certain bonds and certain commodities.

However, even though this type of strategy provides the highest probability of long term success, we also know that the vast majority of traders simply do not have the type of personality necessary to implement this approach long term. As these types of trades move very, very slowly and require an enormous amount of patience. And they also require that you have the emotional discipline (and the desire) to sit through numerous periods of retracements and consolidations, across the various time frames.

Therefore, unless you are the type of trader that can sit on an open trade for weeks, months or even years, then this type of strategy simply isn't going to be very well suited for you. Regardless of how profitable it may be.

BOTTOM LINE:

Every trader is different, and your best chance of success will come from trading a strategy that fits your personality and your personal trading preferences. Preferably a strategy that you develop yourself.

And this is why we created our forecasts to offer our clients as much flexibility as possible.

We will handle all of the complex, time consuming market research (and data analysis) on your behalf. And through our research, we will provide you with a general bias (buy or sell) for all 28 pairs, on three different time frames (daily, weekly and monthly). Allowing you to decide in advance, which pairs you should focus on for the days, weeks and months ahead.

And we will also provide you with the most important liquidity levels for all 28 pairs. Allowing you to target the best possible areas on your charts for managing your trades (entries, exits, stops, profit targets etc.)

But we leave the rest of the decision making process up to you. And this approach allows our clients to apply their own strategies, according to their own preferences. Without having to be confined to any predetermined set of rules.

This means that our forecasts can be used for scalping, reversal trading, swing trading, momentum trading, range trading, trend trading, breakout trading, binary options trading, news events etc. And our forecasts can be used on any time frame that you prefer to trade. From day trading on the 1-minute charts, all the way up to long term position trading on the weekly and monthly charts.

THERE ARE A VARIETY OF WAYS IN WHICH OUR CLIENTS ARE USING OUR FORECASTS:

We have quite a few clients who check in with us on a regular basis, in order to share their progress. And we can see from their different approaches, that there are a number of various filters and rules that our clients are using.

Overall, your trading options are potentially endless when you combine our forecasts with our liquidity levels. And below you will find just a few of these different options:

- 1) Some clients use our daily forecasts, in order to find the best intraday trading opportunities. While other clients look for agreement (confluence) between the daily and weekly forecasts. In order to find the best possible swing trading opportunities.

- 2) Some clients are looking to trade only during the most liquid periods, in order to potentially take advantage of strong intraday momentum or volatility. Especially during the European and New York overlap.

While other clients are looking to trade only during the quietest (and least volatile) periods of the market. In order to potentially take advantage of higher probability ranging opportunities.

- 3) Some clients like to trade strictly price action on naked charts (using no indicators whatsoever). While other clients might have 6 indicators (or more) on their charts.

- 4) Some clients enter their trades on the 1-Min or 5-Min charts, generally looking for quick scalping opportunities. While other clients enter their trades on the 4-Hour charts, generally looking for potential swing trades. And yet other clients are entering their trades on either the daily or weekly charts, looking to profit from the longer term market trends.

- 5) Some clients like to focus on anywhere from 1 to 5 pairs per day (or per week). As they are looking at very specific setups within certain pairs. While other clients trade all 28 pairs at once, by creating large baskets.

- 6) Some clients trade manually, and can sometimes spend numerous hours at their trading desk during the day. While other clients have created their own specialized EA's to trade our forecasts. And spend no more than a few minutes a day on their platforms.

7) Some clients will enter a trade only if the pair is moving in agreement with our recommended bias (buy or sell). While other clients completely ignore the buy or sell recommendations and they focus almost exclusively on the various liquidity levels.

These clients are generally looking for opportunities where they can align the liquidity levels across the various time frames. In order to find the absolute strongest liquidity levels in the market. Therefore, many times creating absolutely perfect, pinpoint entries and exits on their trades.

8) Some clients will stick to one particular strategy on one particular time frame. While other clients will apply their strategy across various time frames. As they are looking to spread their risk across the time frame continuum.

Then there are around 10% of our clients who like to spread the statistical distribution as much as possible (both the risk and the returns), by applying various strategies across various time frames.

This particular approach takes the most time and effort. But this is a highly advanced and highly effective style of trading. And this is the same approach used by some of the largest hedge funds in the world. As this kind of diversification across strategies and time frames is the best way to dampen volatility within a portfolio. Creating the smoothest possible (most stable) equity curves. While avoiding sharp, dramatic drawdowns.

We could continue with a number of additional examples of potential trading strategies and approaches. But as you can already tell, your trading options are potentially endless when you combine our forecasts with our liquidity levels. And regardless of the strategy that you choose to implement, you can be confident in knowing that you'll be able to fit these forecasts into whichever approach you prefer.

Whether you are looking to scalp the 1-Minute charts. Or you are looking to ride the long term trends on the weekly charts. Or anything in between. The choice is completely up to you.

ALSO PLEASE NOTE:

If you have any specific strategies that you are considering using, you can feel free to send us any questions or concerns that you might have. As we offer professional strategy development services to many of our private clients. And one of our dedicated account managers would be happy to discuss any particular questions or concerns that you might have.

Remember, we are not just here to provide you with a profitable forecasting service. Our goal with all of our clients (long term) is to also help you become a better overall trader.
