

SCORPIONFX

SINCE 1995

PSYCHOLOGICAL LEVEL SCANNER:

Studies show that more orders end in '0', than any other number. And this indicator has been designed to automatically identify when prices reach these order levels.

Also known as '*whole numbers*' or '*round numbers*', these levels act as price barriers where large amounts of orders will generally accumulate. And the larger the psychological level, the more orders will generally be placed in that area. Therefore, these levels can be used to define entries and exits and provide a very strong risk and reward ratio.

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It can monitor any symbol in your platform. Including crypto, commodities, indices, ETF's etc.
- Will automatically trigger an alert whenever your selected levels are found.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

Indicator Parameters:

- **Pip Range:** Select the pip levels to monitor.

For example:

If you select '50', the indicator will search for 1.1000, 1.1050, 1.1100, 1.1150 etc.

If you select '100', the indicator will search for 1.1000, 1.1100, 1.1200, 1.1300 etc.

If you select '250', the indicator will search for 1.1250, 1.1500, 1.1750, 1.2000 etc.

If you select '500', the indicator will search for 1.1000, 1.1500, 1.2000, 1.2500 etc.

If you select '1000', the indicator will search for 1.1000, 1.2000, 1.3000, 1.4000 etc.

- **Alert Interval Minutes:** Choose time interval for receiving alerts on a specific pair.

For example:

Do you wish to be alerted every time price touches the specified level?

Or do you prefer to be alerted only one time every 'X' minutes?

This parameter lets you choose this alert interval.

- **Symbols:** Monitors the top 28 pairs by default, but you can select less pairs if you wish.

See the images and information below for further details.
And contact us if you have any questions.

We reply to all questions within 24 hours. And depending on the total volume of inquiries that we have, we can sometimes answer in less than 1 hour. Even on weekends and holidays.

We are always here to help.

THIS INDICATOR MONITORS ALL 28 PAIRS AND LOOKS FOR PRICES THAT REACH MAJOR PSYCHOLOGICAL LEVELS.

WHEN A SPECIFIED LEVEL IS REACHED, THE INDICATOR WILL TRIGGER AN ALERT.

GENERAL DESCRIPTION:

This indicator monitors all 28 pairs and all the time frames. And it automatically identifies when specific price levels are reached.

When one of these price levels are reached, it will send you a real time alert.

VERY IMPORTANT PLEASE NOTE:

In addition to forex pairs, this indicator can also monitor any other symbol that is offered in your Metatrader platform. Including crypto, commodities, indices, equities, ETF's etc.

Best of all, this indicator only needs to be placed on one chart. And it will simultaneously monitor the entire market, all on one screen. Allowing you to easily find as many trading opportunities as possible.

This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis. And this will allow you to focus on other aspects of your trading. Such as further technical or fundamental analysis.

The image shows a trading alert notification at the top with a yellow bell icon and the text "Price touches the '00' level on EURNZD". Below it is a log entry: "12:20:04 Price touches the '00' level on EURNZD". A red box with white text says: "WHEN PRICES REACH YOUR SPECIFIED LEVEL, YOU WILL RECEIVE AN ALERT LIKE THIS." Below this, another red box with white text says: "YOU HAVE FULL CONTROL OVER THE LEVELS YOU WISH TO MONITOR. YOU CAN ALSO CHOOSE WHICH PAIRS TO KEEP TRACK OF AND HOW OFTEN TO RECEIVE ALERTS." A green arrow points from this box to a configuration window. The configuration window has tabs: "About", "Common", "Inputs", "Colors", "Visualization". The "Inputs" tab is active, showing a table:

Variable	Value
PipRange	1000
AlertIntervalMinutes	15
Symbols	AUDCAD,AUDCHF,AUDJPY

SAMPLE ALERT AND INDICATOR PARAMETERS:

When prices reach your specified level, you will receive an alert letting you know the instrument, the price level and the market time of the alert.

PIP RANGE:

You have full control over which levels you wish to monitor.

FOR EXAMPLE:

If you select '50', the indicator will search for 1.1000, 1.1050, 1.1100, 1.1150 etc.

If you select '100', the indicator will search for 1.1000, 1.1100, 1.1200, 1.1300 etc.

If you select '250', the indicator will search for 1.1250, 1.1500, 1.1750, 1.2000 etc.

If you select '500', the indicator will search for 1.1000, 1.1500, 1.2000, 1.2500 etc.

If you select '1000', the indicator will search for 1.1000, 1.2000, 1.3000, 1.4000 etc.

MINUTES BETWEEN ALERTS:

You can choose the time interval for receiving alerts on a given pair (every "X" number of minutes).

FOR EXAMPLE:

If you set this to '60', and you get a signal on the EURUSD, then you will only receive an alert for this pair once every 60 minutes (once per hour).

This is very helpful if you want to avoid receiving continuous repetitive alerts for the same pair.

PAIRS TO MONITOR:

You have full control over which pairs you would like to monitor. The indicator monitors all 28 pairs by default. But you can choose to monitor fewer pairs if you wish.

**RECEIVE TWO FREE BONUSES
WITH YOUR NEW INDICATOR**

FREE BONUS # 1:

**RECEIVE BOTH METATRADER FILES
FOR YOUR NEW INDICATOR (MT4 AND MT5)
(*LIMITED TIME OFFER FOR NEW CLIENTS ONLY)**

Most traders will at some point use both versions of the Metatrader platform.
As **both platforms have their own distinct advantages** over the other.

MT4 has a larger selection of available indicators and EA's than MT5.
While MT5 has some additional features that are not available on MT4.
So it is quite common for traders to use both platforms.

Unfortunately, whenever a trader decides to move between platforms,
they generally need to go out and spend additional money on the
other platforms' version of their favorite indicators.

But our clients do not have to spend this additional money.

**With the purchase of any of our custom indicators, you will receive both versions
of your new indicator, right from the start.** This means you will receive (both)
the file **for MT4** and the file **for MT5**. Allowing you to use your new indicator
on the Metatrader platform of your choice. At no additional cost.

FREE BONUS # 2:

**START SEEING RESULTS AS QUICKLY AS POSSIBLE
WITH THE **ULTIMATE STARTER PACKAGE****

You will receive several important PDFs with your new indicator.
These PDFs were created by our ScorpionFX trading team.
And include a wealth of trading information and insight.

Including information for getting the **best possible results** with your
new indicator. As well as **critical information** for improving your
trading skills. And advancing your long-term development.
