SINCE 1995

## PIVOT POINT SCANNER:

This indicator has been designed to automatically identify when price reaches a specified pivot level. It comes pre-loaded with the most popular pivot calculations. And it can monitor all pairs, across all time frames. All at the same time.

### **IMPORTANT FACTOR TO KEEP IN MIND:**

*For decades, floor traders (and market makers) have used pivot points to determine critical levels of support and resistance. And through the phenomenon of 'self fulfilling prophecy', these levels often act as price barriers where large amounts of institutional orders can accumulate.*

*Therefore, these levels can be used to define entries and exits. As well as provide a very strong risk and reward ratio.*

### Features:

- This indicator can monitor all 28 pairs at the same time.
- You have full control to monitor as few (or as many) pairs as you wish.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- The indicator will trigger an alert whenever a specified pivot point is reached.
- You can choose from Classic, Camarilla, Woodie's, Demark and Fibonacci pivots.
- It can monitor any symbol in your platform. Including crypto, commodities, indices, equities, etc.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

## Indicator Parameters:

- **Pivot Type:** Select from Standard, Woodie's, Camarilla, Demark or Fibonacci.
- **Symbols:** Monitors the top 28 pairs by default, but you can select less pairs if you wish.
- **Use M1 TimeFrame:** True = Yes, False = No
- **Use M5 TimeFrame:** True = Yes, False = No
- **Use M15 TimeFrame:** True = Yes, False = No
- **Use M30 TimeFrame:** True = Yes, False = No
- **Use H1 TimeFrame:** True = Yes, False = No
- **Use H4 TimeFrame:** True = Yes, False = No
- **Use D1 TimeFrame:** True = Yes, False = No
- **Use W1 TimeFrame:** True = Yes, False = No
- **Use MN1 TimeFrame:** True = Yes, False = No
- **Alert Interval Minutes:** Choose time interval for receiving alerts on a specific pair.

### For example:

Do you wish to be alerted every time price touches the pivot level?  
Or do you prefer to be alerted only one time every 'X' minutes?  
This parameter lets you choose the alert interval.

**THIS INDICATOR CAN BE PLACED ON ONE CHART AND IT WILL MONITOR ALL 28 PAIRS AT THE SAME TIME.**

**WHENEVER A PIVOT POINT IS REACHED, THE INDICATOR WILL TRIGGER AN ALERT.**

### **GENERAL DESCRIPTION:**

This indicator monitors all 28 pairs and all the time frames. And it continuously looks for prices reaching specific pivot point levels. And when one of these levels are reached, it will send you a real time alert.

### **VERY IMPORTANT PLEASE NOTE:**

In addition to forex pairs, this indicator can also monitor any other symbol that is offered in your Metatrader platform. Including crypto, commodities, indices, equities, ETF's etc.

Best of all, this indicator only needs to be placed on one chart. And it will simultaneously monitor the entire market, all on one screen. Allowing you to easily find as many trading opportunities as possible.

This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis. And this will allow you to focus on other aspects of your trading. Such as further technical or fundamental analysis.

**WHENEVER PRICE TOUCHES A PIVOT POINT, YOU WILL RECEIVE AN ALERT LIKE THIS.**

**YOU HAVE FULL CONTROL OVER THE CALCULATIONS YOU WISH TO USE. YOU CAN ALSO CHOOSE WHICH PAIRS TO MONITOR AND HOW OFTEN TO RECEIVE ALERTS.**

Variable	Value
PivotType	Demark
AlertIntervalMinutes	15
Symbols	AUDCAD,AUDCHF,AUDJPY

### ALERTS AND INDICATOR PARAMETERS:

The alerts will provide you with all the details you need. Including the following:

- The pair and the time frame where the pivot level has been reached.
- The exact pivot level that has been reached.
- The market time of the alert.

#### 1) PIVOT TYPE:

You can choose from a variety of pivot point calculations. Including Classic, Camarilla, Woodie's, Demark and Fibonacci pivots.

#### 2) PAIRS TO MONITOR:

You have full control over which pairs you would like to monitor. The indicator monitors all 28 pairs by default. But you can choose to monitor fewer pairs if you wish.

### **3) TIME FRAMES TO MONITOR:**

You also have full control over which time frames you wish to monitor. The indicator monitors all 9 time frames by default. But you can choose to monitor fewer time frames if you wish.

### **4) ALERT INTERVAL MINUTES:**

You can choose the time interval for receiving alerts on a given pair and time frame (every "X" number of minutes).

#### **FOR EXAMPLE:**

If you set this to '60', and you get a signal on the EURUSD 1 hour chart, then you will only receive an alert for this pair and this time frame once every 60 minutes (once per hour).

Even if price reaches the pivot point several times.

This is very helpful if you want to avoid receiving continuous repetitive alerts for the same pair and the same time frame.

***These are extremely simple and straight forward signals to trade.  
Without the need for you to analyze any type of unnecessary data.  
And without the need for you to decipher any kind of complex patterns.***

***And best of all, the indicator will do all of the hard work of finding these instances for you. Anywhere across the entire market.***

**RECEIVE TWO FREE BONUSES  
WITH YOUR NEW INDICATOR**

### **FREE BONUS # 1:**

**RECEIVE *BOTH* METATRADER FILES  
FOR YOUR NEW INDICATOR (*MT4 AND MT5*)  
(\**LIMITED TIME OFFER FOR NEW CLIENTS ONLY*)**

Most traders will at some point use both versions of the Metatrader platform.  
As **both platforms have their own distinct advantages** over the other.

MT4 has a larger selection of available indicators and EA's than MT5.  
While MT5 has some additional features that are not available on MT4.  
So it is quite common for traders to use both platforms.

Unfortunately, whenever a trader decides to move between platforms,  
they generally need to go out and spend additional money on the  
other platforms' version of their favorite indicators.

*But our clients do not have to spend this additional money.*

**With the purchase of any of our custom indicators, you will receive both versions  
of your new indicator, right from the start.** This means you will receive (both)  
the file **for MT4** and the file **for MT5**. Allowing you to use your new indicator  
on the Metatrader platform of your choice. At no additional cost.

### **FREE BONUS # 2:**

**START SEEING RESULTS AS QUICKLY AS POSSIBLE  
WITH THE *ULTIMATE STARTER PACKAGE***

You will receive several important PDFs with your new indicator.  
**These PDFs were created by our ScorpionFX trading team.**  
And include a wealth of trading information and insight.

Including information for getting the **best possible results** with your  
new indicator. As well as **critical information** for improving your  
trading skills. And advancing your long-term development.
