PERFECT PENNANTS AND TRIANGLES (BREAKOUT SCANNER):

This indicator has been designed to automatically identify high probability breakout patterns.
And it does this by finding very strong, symmetrical pennants and triangles.

IMPORTANT FACTORS TO KEEP IN MIND:

Pennants and triangles are some of the best possible entry areas. As they allow you
to have excellent risk and reward ratios. And this is one of the most important factors
in the institutional trading world.

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, ETF's etc.
- Will automatically trigger an alert whenever your selected levels are found.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.
