AS WELL AS SOME VERY, VERY IMPORTANT TRADING INFORMATION.
FOR ACHIEVEING THE BEST RESULTS IN YOUR LONG TERM TRADING CAREER.

CONSECUTIVE BAR SCANNER:

This indicator has been designed to find a predetermined number of consecutive bars. It can identify both bull and bear candles and you can select exactly how many candles you wish to look for.

You can combine this indicator with any number of indicators or strategies. Including MACD, RSI, CCI, Fib retracements etc. And the goal is to look for situations where prices are severely over extended, in order to profit from the inevitable reversal or retracement.

IMPORTANT FACTOR TO KEEP IN MIND:

*Unlike the equity markets, the forex market is a stationary time series.
Therefore, when prices become severely over extended, it is only a matter of time
before they make a retracement. And eventually a reversal.*

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- The indicator will automatically look for both bull and bear candles.
- The indicator will trigger an alert whenever your desired number of consecutive candles found.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, equities, etc.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

Indicator Parameters:

- **Xbars:** Number of candles to look for. You can choose any number you wish (we recommend at least 10-15).
- **Symbols:** The indicator monitors the top 28 pairs by default, but you can select less pairs if you wish.
