FOR ACHIEVEING THE BEST RESULTS IN YOUR LONG TERM TRADING CAREER.

ULTIMATE DIVERGENCE SCANNER:

This indicator has been designed to automatically identify when a divergence occurs between price and an oscillator. It can identify both bull and bear divergence and it is already loaded with four of the most popular oscillators. You can choose from RSI, MACD, Stochastics and CCI.

IMPORTANT FACTORS TO KEEP IN MIND:

*When a divergence occurs, it means that price and momentum are not in agreement.
And divergence signals are widely used by institutional traders to identify potential reversals.
As it is a widely known market principle that momentum generally precedes price.*

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It will automatically trigger an alert whenever the appropriate pattern is identified.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, equities, ETF's etc.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.
