===

THIS IS A BASIC OVERVIEW OF THE BENEFITS, FEATURES AND PARAMETERS OF THIS INDICATOR.

BUT PLEASE BE SURE TO CONTACT US AFTER YOUR PURCHASE. AND WE WOULD BE HAPPY

TO SEND YOU MANY MORE DETAILS REGARDING THIS INDICATOR AND THE BEST

WAYS TO USE IT. INCLUDING ADVICE ON THE BEST PAIRS TO MONITOR,

BEST TIME FRAMES, BEST SETTINGS ETC.

AS WELL AS SOME VERY, VERY IMPORTANT TRADING INFORMATION.

FOR ACHIEVEING THE BEST RESULTS IN YOUR LONG TERM TRADING CAREER.

===

ULTIMATE DOUBLE TOP SCANNER:

This indicator has been designed to automatically identify high probability double tops and double bottoms. It can also be used to identify triple-tops and triple-bottoms. And it includes an RSI trend filter, in order to identify the formations that occur at the top (or bottom) of a trend.

IMPORTANT FACTORS TO KEEP IN MIND:

Any major level that holds 2 or 3 times is obviously a level that is being defended by the large institutions. Therefore, there is a strong probability that a reversal will occur in these areas. And this probability is even higher in the case of a triple top (or triple bottom).

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It will automatically trigger an alert whenever the appropriate pattern is identified.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, equities, ETF's etc.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

Indicator Parameters:

- **Type Of Bottom:** Doubles = Double Tops and Bottoms, Triples = Triple Tops and Bottoms.
- **RSI Period:** Setting for RSI filter
- **Upper Level:** Overbought level for RSI filter. First bottom must form above this level in order to be valid.
- **Lower Level:** Oversold level for RSI filter. First bottom must form below this level in order to be valid.
- **Bars Between:** The minimum number of bars between tops / bottoms.
- **Pips Distance:** The number of pips within each top / bottom.
- **Symbols**: The indicator monitors the top 28 pairs by default, but you can select less pairs if you wish.
- **Alert M1**: True = Yes, False = No
- **Alert M5**: True = Yes, False = No
- **Alert M15**: True = Yes, False = No
- **Alert M30**: True = Yes, False = No
- **Alert H1**: True = Yes, False = No
- **Alert H4**: True = Yes, False = No
- **Alert D1**: True = Yes, False = No
- **Alert W1**: True = Yes, False = No
- **Alert MN1**: True = Yes, False = No

See the images (on our site) for further details and contact us if you have any questions.

We reply to all questions within 24 hours. And depending on the total volume of inquiries that we have, we can sometimes answer in less than 1 hour. Even on weekends and holidays.

We are always here to help.   =)
