PSYCHOLOGICAL LEVEL SCANNER:

This indicator has been designed to automatically identify when prices reach major psychological levels.

Also know as '*whole numbers*' or '*round numbers*', these levels act as price barriers where large amounts of orders will generally accumulate. And the larger the psychological level, the more orders will generally be placed in that area.

Therefore, these levels can be used to define entries and exits and provide a very strong risk and reward ratio.

IMPORTANT FACTORS TO KEEP IN MIND:

- Studies shows that more orders end in '0' than any other number.
- We recommend levels of at least 100-pip multiples. Such as 100, 1000 etc.

The higher the number, the stronger the psychological significance.
And the higher the probability that a large number of institutional orders will be in that area.

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, ETF's etc.
- Will automatically trigger an alert whenever your selected levels are found.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

Indicator Parameters:

- **Pip Range**: Select the pip levels to monitor.

  For example:

  If you select '50', the indicator will search for 1.1000, 1.1050, 1.1100, 1.1150 etc.

  If you select '100', the indicator will search for 1.1000, 1.1100, 1.1200, 1.1300 etc.

  If you select '250', the indicator will search for 1.1250, 1.1500, 1.1750, 1.2000 etc.

  If you select '500', the indicator will search for 1.1000, 1.1500, 1.2000, 1.2500 etc.

  If you select '1000', the indicator will search for 1.1000, 1.2000, 1.3000, 1.4000 etc.

  - **Alert Interval Minutes:** Choose time interval for receiving alerts on a specific pair.

    For example:

    Do you wish to be alerted every time price touches the pivot level?
    Or do you prefer to be alerted only one time every 'X' minutes?
    This parameter lets you choose this alert interval.

  - **Symbols**: Indicator monitors the top 28 pairs by default, but you can select less pairs if you wish.

See the images (on our site) for further details and contact us if you have any questions.

We reply to all questions within 24 hours. And depending on the total volume of inquiries that we have, we can sometimes answer in less than 1 hour. Even on weekends and holidays.

We are always here to help.   =)
