**REAL-WORLD TRADING
WITH A HEDGE-FUND INSIDER.**

SCORPIONFX.COM

**THIS IS A BASIC OVERVIEW OF THE BENEFITS,
FEATURES AND PARAMETERS OF THIS INDICATOR.**

BUT PLEASE BE SURE TO CONTACT US AFTER YOUR PURCHASE. AND WE WOULD BE HAPPY
TO SEND YOU MANY MORE DETAILS REGARDING THIS INDICATOR AND THE BEST
WAYS TO USE IT. INCLUDING ADVICE ON THE BEST PAIRS TO MONITOR,
BEST TIME FRAMES, BEST SETTINGS ETC.

AS WELL AS SOME VERY, VERY IMPORTANT TRADING INFORMATION.
FOR ACHIEVEING THE BEST RESULTS IN YOUR LONG TERM TRADING CAREER.

ULTIMATE MOVING AVERAGE SCANNER:

This indicator has been designed to find various types of moving average crossovers.
And combined with your own rules and techniques, this indicator will allow you to create
(or enhance) your own powerful system.

- Moving average crossovers are very simple to trade, with clear "buy or sell" signals.
- Moving average crossovers offer a clear indication of the different phases of a trend.
Such as expansion, pullback, consolidation and reversal.

IMPORTANT FACTORS TO KEEP IN MIND:

*Institutional traders use moving averages more than ANY other indicator.
Specifically the 20, 50, 100, 150 and 200.*

Features:

- This indicator can monitor all 28 pairs at the same time.
- It can monitor every timeframe, from 1 Minute to Monthly. All at the same time.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, ETF's etc.
- It will automatically trigger an alert whenever the appropriate crossovers are identified.
- It can monitor crossovers for anywhere between 2 and 5 moving averages (2, 3, 4 or 5).
- It can monitor several MA calculation methods (simple, exponential, smoothed and linear weighted).

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

VERY IMPORTANT, PLEASE NOTE:

THE ALERTS HAVE BEEN DESIGNED TO BE TRIGGERED WHEN ALL OF THE MOVING AVERAGES ARE IN CONSECUTIVE ALIGNMENT. AND THIS IS GENERALLY THE AREA WHERE PRICE MAKES A POWERFUL AND DEFINITIVE MOVE TO ONE SIDE OR THE OTHER.

IF YOU USE CROSSOVER ALERTS THAT ONLY LOOK AT PRICE CROSSING OVER THE AVERAGES, YOU WOULD GET MANY MORE WHIPSAWS AND FALSE SIGNALS. AND OUR GOAL IS TO AVOID AS MANY FALSE SIGNALS AS POSSIBLE.

Indicator Parameters:

- **Number of MA to use:** number of moving averages you wish to monitor (2 MA crossover, 3 MA crossover etc).
- **MAPeriod:** Select the lookback period for each MA. The most important are 20, 50, 100, 150 and 200.
- **MAMethod:** Select the calculation method for each MA. The most widely used are simple and exponential.
- **Candle Alert:** Receive alerts on candle close, or during active candle. We recommend on candle close.
- **Bullish Alert:** True = Yes, False = No
- **Bearish Alert:** True = Yes, False = No
- **Minutes Between Alert:** The time interval for receiving alerts on a given pair (every "X" number of minutes).
- **Symbols:** The indicator monitors the top 28 pairs by default, but you can select less pairs if you wish.

See the images (on our site) for further details and contact us if you have any questions.

We reply to all questions within 24 hours. And depending on the total volume of inquiries that we have, we can sometimes answer in less than 1 hour. Even on weekends and holidays.

We are always here to help. =)
