BEST TIME FRAMES, BEST SETTINGS ETC.

AS WELL AS SOME VERY, VERY IMPORTANT TRADING INFORMATION.  
FOR ACHIEVEING THE BEST RESULTS IN YOUR LONG TERM TRADING CAREER.

---

## **PIVOT POINT SCANNER:**

This indicator has been desinged to automatically identify when price reaches a specified pivot point level.  
And it can monitor the entire market in the background.

This will save you an enormous amount of time and effort going forward. As it will allow you to focus on  
other aspects of your trading.

### **IMPORTANT FACTORS TO KEEP IN MIND:**

*For many years, floor traders (and market makers) have used pivot points to determine critical levels of support and resistance. And these levels often act as price barriers where large amounts of orders can accumulate.*

*Therefore, these levels can be used to define entries and exits. As well as provide a very strong risk and reward ratio.*

## Features:

- This indicator can monitor all 28 pairs at the same time.
- You have full control to monitor as few (or as many) pairs as you wish.
- The indicator will trigger an alert whenever a specified pivot point is reached.
- You can choose from Classic, Camarilla, Woodie's, Demark and Fibonacci pivots.
- It can monitor any symbol in your Metatrader platform. Including crypto, commodities, indices, equities, etc.

This indicator only needs to be placed on one chart and it will simultaneously monitor the entire market, all on one screen. This will save you an enormous amount of time and effort. As you won't have to flip through dozens of charts for analysis.

And this will allow you to focus on other aspects of your trading. Such as further technical (or fundamental analysis). This will also give you more time to find other trading opportunities.

## Indicator Parameters:

- **Pivot Type:** Select the pivot calculation you wish to use. Standard, Woodie's, Camarilla, Demark or Fibonacci.
- **Symbols:** The indicator monitors the top 28 pairs by default, but you can select less pairs if you wish.
- **Alert Interval Minutes:** Choose time interval for receiving alerts on a specific pair.

### For example:

Do you wish to be alerted every time price touches the pivot level?  
Or do you prefer to be alerted only one time every 'X' minutes?  
This parameter lets you choose the alert interval.

*See the images (on our site) for further details and contact us if you have any questions.*

We reply to all questions within 24 hours. And depending on the total volume of inquiries that we have, we can sometimes answer in less than 1 hour. Even on weekends and holidays.

*We are always here to help.* =)
